

PRACTICAL SOLUTIONS TO COMPLEX FINANCIAL PROBLEMS

Our advanced financial analytics tools solve real-world problems while remaining simple and easy to use. With online and in-house solutions in securities and fixed-income analytics, credit-adjusted ALM, liquidity, risk management, budgeting and funds transfer pricing, we can help you better manage your risk and profitability. We also offer solutions to meet the ever-evolving regulatory risk reporting requirements.

Today, nearly 1,500 financial institutions depend on ZM Financial Systems' products/analytics to identify, measure and monitor risk and value in their balance sheets. Whether you are a large financial institution, credit union, community bank, broker/dealer or consultant, we have solutions to meet your needs. We empower you to uncover hidden risk while maximizing performance; test lending, investment and funding strategies; and respond to broad regulatory requirements while efficiently delivering actionable information.

Our solutions include:

ZMDESK™ For Securities and Full Balance Sheet Management

ABOUT ZM FINANCIAL SYSTEMS

ZM Financial Systems brings practical solutions to complex financial problems, offering complete solutions in securities and fixed-income analytics, credit-adjusted ALM, liquidity, risk management, budgeting and funds transfer pricing. We also offer large bank solutions to meet the evolving regulatory risk reporting requirements. With 1,500 institutions depending on ZMFS products/analytics to identify, measure and monitor risk and value in their balance sheets, we are one of the fastest growing financial software companies in the U.S.

Founded in 2003, ZMFS is a privately-held corporation headquartered in Cary, N.C. In addition to the 25 percent of our staff who have PhD's in the advanced quantitative field, our development and product support teams all have experience in the finance arena. Because our teams continuously collaborate, we can quickly navigate complex solutions to complete client-requested enhancements in days or weeks, versus months or years.

Delivering state-of-the-art risk/reward analysis tools, such as ZMdesk, OnlineALM.com and OnlineBondSwap.com, our clients are empowered to uncover hidden risk while maximizing performance; test lending, investment and funding strategies; and respond to various regulatory requirements while efficiently delivering actionable information.
