

ZM Financial Systems is seeking a **Microsoft SQL Server Developer** in our Cary, N.C. headquarters. Our solutions provide risk analytics, asset/liability management, pre-trade analytics and budgeting to some of the world's largest and most sophisticated financial institutions.

The Microsoft SQL Server Developer will be responsible for developing and optimizing in-application SQL statements as well as designing and maintaining Microsoft SQL Server databases and ensuring their stability, reliability, and performance. A strong background in Microsoft SQL Server is required, and experience using C#, C++, and/or Java is beneficial. Any DBA experience is also highly desired.

Responsibilities

- Development of high quality, optimized SQL statements
- Optimize and implement SQL statements to handle large datasets
- Ensure security and availability of databases
- Prepare documentations and specifications
- Profile server resource usage, and optimize and tweak as necessary
- Collaborate with other team members and stakeholders

Skills and Qualifications

- Strong proficiency of SQL programming using Microsoft SQL Server
- Excellent understanding of Microsoft SQL Server
- Skilled at optimizing large complicated SQL statements
- Knowledge of best practices when dealing with relational databases
- Capable of configuring popular database engines and orchestrating clusters as necessary
- Ability to plan resource requirements from high level specifications
- Capable of troubleshooting common database issues
- Familiar with tools that can aid with profiling server resource usage and optimizing it

The following are optional, but beneficial:

- Microsoft SQL Server Certification
- Experience developing in a production environment with C#, C++, and/or Java
- DBA experience
- MySQL experience
- Powershell experience

Benefits:

- Competitive Salary
- 401k plus company matching
- Company paid medical, dental and vision insurance

Submission:

- Please send cover letter and resume directly to: allyson.bebek@zmfs.com
- Solicitations from third-party recruiters not accepted
